

A Travel Plan is a document that sets out a comprehensive strategy to facilitate and encourage the uptake of sustainable and active modes of travel to and from a place of work or study. One has been created for our company.

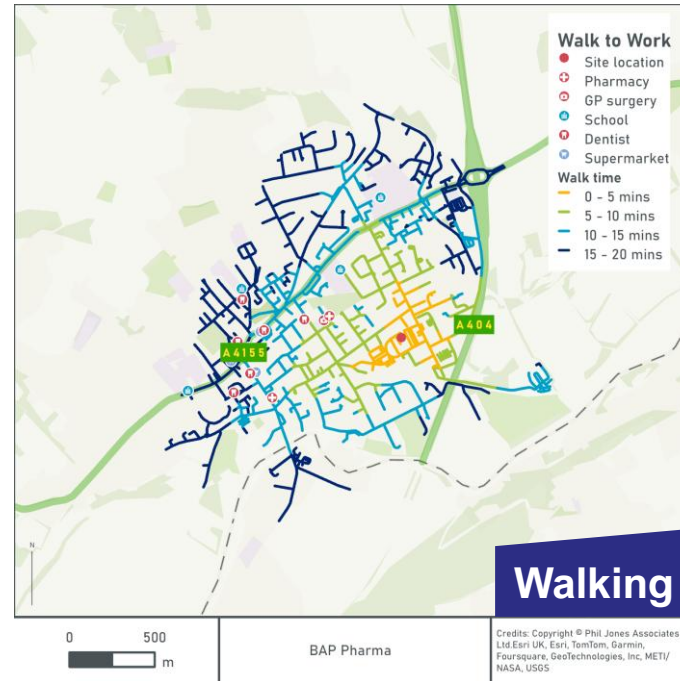

The Travel Plan aims to encourage employees to travel to the site by modes of travel other than by single-occupancy car and ensure visitors to the site have an informed choice about their travel options other than by single-occupancy car.

The way you travel to and from your home can save you money, improve your health through increased exercise and help to cut carbon emissions.

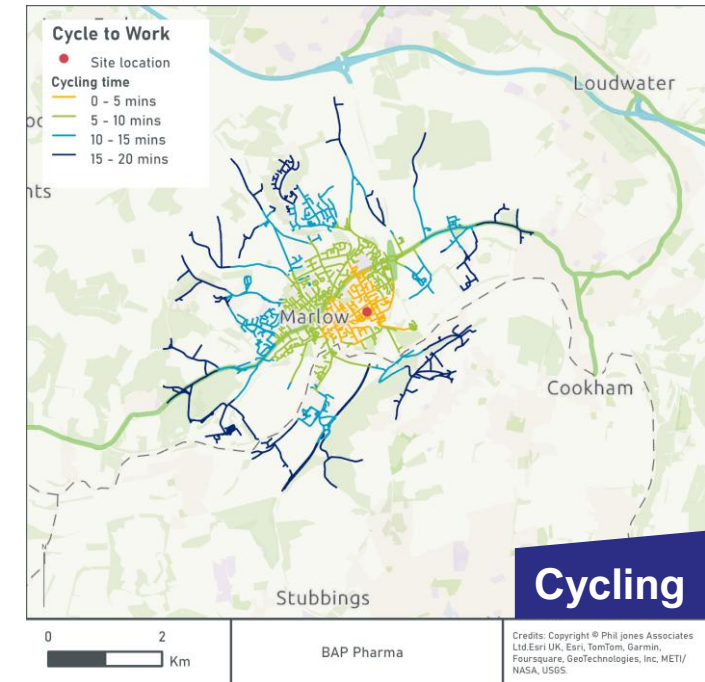

A specialist Travel Plan Coordinator has been appointed to manage delivery of the Travel Plan. They will provide, at no cost personalised travel planning to employees at the site.

Your Travel Plan Coordinator is:
Margaret McCarthy
margaret.mccarthy@bappharma.com

Cycling is a great alternative to driving to work for people of all ages and abilities. It's good for the environment, you can save money, and it has great physical and mental health benefits. The majority of Marlow is accessible within 20 minutes of cycling from the site.

With the recommendation for adults to undertake 2.5 hours of moderate activity per week, walking to work is a great way to stay active. There are excellent walking facilities around the site, with a large portion of the town accessible within 20 minutes, including a number of amenities such as pharmacies, supermarkets and schools.

Use apps like Citymapper, Go Jauntly and Cyclestreets to plan journeys, and Better Points Bucks to earn vouchers for healthy activities.

The nearest bus stop to the site is an approximate 10-minute walk away, providing services towards High Wycombe. Travelling by rail is also simple, with Marlow station around a six-minute walk from the site, providing services to Maidenhead and Bourne End.

Car Sharing

To save money and help reduce your carbon footprint, you could consider sharing your trip with another car user. The benefits of car sharing include reduced fuel costs and parking fees, and less congestion and shorter journey times due to fewer cars being on the road.

A car sharing group is being considered for the site. Ask your TPC for more details.
